WITH all efforts now being directed towards the production of peace time goods, we may confidently look forward to horticultural expansion. The need for growing all the vegetables possible is not now so acute, but it is nevertheless desirable to devote at least some garden space to early vegetables.

Shortages of flower seeds, due to the restrictions of war time, unfortunately still persist and some favored subjects are difficult if not impossible to obtain. Our long experience in Horticulture enables us, however, to offer a comprehensive selection and we can assure our patrons that everything listed is of the finest quality. No better strains of seeds and bulbs are procurable at any price.

If anything you desire in *Plants, Seeds* or *Bulbs* is not listed, do not hesitate to write us. If it exists we will obtain it if humanly possible.

Business Terms: Prices quoted in this catalog are net, 30 days. All goods are offered, subject to being unsold on receipt of order, and we reserve the right to change prices if necessary.

We deliver free by Parcel Post or Express all orders for Vegetable and Flower Seeds when cash accompanies the order.

All goods travel at purchaser's risk after they are in the hands of any common carrier.

Orders from unknown parties must be accompanied by cash or satisfactory references.

Claims must be made on receipt of goods, otherwise they will not be considered

Packing charges will be made on all plant shipments and on other shipments requiring special attention.

NON-WARRANTY

While we take precaution to ship only such merchandise as will produce satisfactory results under normal conditions, the nature of our products is such that we cannot guarantee description, quality or productiveness of seeds, bulbs or plants; and cannot hold ourselves responsible for the crop. Only under such condition can we execute orders for merchandise covered by this catalog

Vegetable Seeds

We offer the following strains obtained from specialists, each in his own particular field, and it is our belief that no better can possibly be procured. They are all of the highest germination and putity.

Lawn Grass Mixtures

The result of many years of intensive application has enabled us to improve our mixtures greatly with superior strains. Our mixtures are recognized by their closer growth and improved color throughout the year. During dry periods and adverse conditions they show a remarkable resistance.

For new lawns we recommend sowing 200 lbs. to the acre. For renovating lawns use half of this quantity.

Prices subject to change. All F.O.B. New York

GLADIOLUS

We offer selected No. 1 bulbs only. It is recommended that, if possible, a new planting area be used each year for these. All bulbs supplied are thoroughly fumigated and dipped but as a further precaution soaking bulbs for six hours in a solution of Lysol disinfectant mixed four teaspoonsful to one gallon of water is suggested. Watch plants closely and if gray spots show up on foliage when 6 inches or so high spray with following solution every ten days or two weeks— $\frac{1}{2}$ lb. brown sugar in 3 gallons of water to which is added 2 ounces of Tartar Emetic.
